MINING, BUSINESS AND STOCKS.

EASTERN PRINCE TO BEGIN DEVELOPMENT

Local Firm Secures Ontion on Control And Will Start to Sink on the Property.

The firm of Dern & Thomas of this city, together with Murray C. Godbe, has just secured an option on the control of the Eastern Prince Gold and Silver Mining company which joins immediately on the east of the Prince Consolidated in Pioche. This option carries with it a contract to sink 300 feet on the property and develop it at depth. Powers & Marioneaux and Patrick Shehan were the large stockholders of the company and it is said that more than once they refused good cash offers for the property, preferring to retain an interest and pront by any results that might be attained from an active and intelligent company of deresults that might be attained from an active and intelligent campaign of development. This option still leaves them with large holdings in the company and provides for a working capital that is deemed sufficient for the present needs.

and provides for a working capital that is deemed sufficient for the present needs.

These claims were located years ago by different parties and were later merged into the present company. The claims are known as the Helen No. 1, Helen No. 2, Helen Fraction, Triangle Fraction, S. Panaca Nos. 1, 2, 3 and 4.

Mr. Thomas in speaking of their plans said: "The property lies just east of the Prince on the dip of the lime beds that are known to be ore bearing in that property. The Pioche King which has developed ore lies to the north of the Prince and northwest of our property. The Centennial Pioche lies just south of, the Prince and southwest of the Eastern Prince. This property 12 de a strike this week in the bottom of the Strike this week in the bottom of the shaft. It is generally known that in the section where we are operating that shale is found on the surface. Under this lies porphyry which in turn is underlaid by a finer shale. In sinking under this fine shale, lime is encountered that bears the ore. The Helen No. 1 has a 40-foot shaft near the Prince line. The Prince at this point and we will probably sink that shaft 200 feet deeper and get down into the lime. Under the terms of the ontion we must do at least 300 feet of sinking and must equip the property with a hoisting plant. This has been ordered and a representative leaves tomorrow for Pioche to look over the ground and to decide upon the best method for development. We have agreed to spend decide upon the best method for development. We have agreed to spend not less than \$5,000 for development and it may exceed that amount.

UTAII-WYOMING PROGRESS.

Fred Kehler, superintendent of the Utah-Wyoming consolidated Oil company operating in the big Horn Basin, Wyoming, writes to the company that well No. 6 is down 650 feet, and that well No, 6 is down 650 feet, and that he expects to case in a few days and move back to well No. 5 and get down to the oil sands. Well No. 6 was driven on the crest of the anticlino just to the northwest of No. 5 and is getting into the oily shale. Well No. 5 is down 1,435 feet through 1,000 feet of oily shale and not yet into the sand. It flows gas and water and oil continuation of the control of the control of the control of the control of oily and it is estimated that it would be a good producer at the present time be a good producer at the present time if worked as such. The Gray Bull sand lies below this shale and it is the intention of the company to get into that formation where they expect a

ORE RESERVES AT IRON BLOSSOM

Mining Man Says That More Ore Is Being Blocked Out Than Shipped.

A mining man who has just re-

turned from Tintic made an inspection of the Iron Blossom the first of the week and was shown through the the week and was shown through the big cave that was recently struck on the 400-foot level of that property. "This cave," he said, "was struck on the south end after about 400 feet of drifting approximately parallel to it but to the west. It is about 375 feet long and had the drift on the 400 which was run south of the shaft been continued for about 30 feet further last spring when it ran into the porphyry, it would have opened this cave. The porphyry proved to be a flow. There is some ore left in the No. 3 workings near the Sloux line. a flow. There is some ore left in the No. 3 workings near the Sloux line, but to the south It gets lower grade. On the east side of the cave, there is about 200 feet of ore but whether or not it is in place is hard to determine at this time. The cave strikes south 20 degrees west and is in a line with the number I shaft. As to whether or not the ore is continuous between, is hard to determine, but it is generally presumed that such is the case. A drift is being run on the 500-foot level to cut under this cave and I believe it will open up the ore. A winze has been sunk in the ore in the cave, but It is not in place at that point. In the No. I shaft, a crosscut is being run on the shaft, a crosscut is being run on th 1,700-level to hit the fissure at depth. Work is also being prosecuted on the 500, 600 and 800-foot levels. It is about 700 feet from the south face on the 500-foot level to 3 the governor line. The gold strike made last spring has turned into about the same class of ore as the rest on the 500-foot level A. .700-level to hit the fissure at depth ore as the rest on the 500-foot level. At the present time only about 50 tons per day are being shipped from this part of the mine and there is more ore in sight now than ever before. Iron Blossom has good possibilities of opening up ore going down on the fis-sure and it might be that it would make copper at depth."

RED TOP EXTENSION.

The recent strike on the 421-foot level of the Red Top Extension which is about three and one-half feet wide is reported to be holding out well, averag-ing between \$25 and \$35 per ton, and was made about 10 feet from where leasers gave up hopes of getting ore. Several hundred tons have already been broken for shipment.

MARKET HOLDS IN SPOTS.

Colorado held firm on the exchange today but Iron Blossom weakened off to 29 on the close on the expectations that the next dividend will be passed on account of the company not having signed an ore contract. Iron Blossom is only shipping about 50 tons per day is only shipping about 50 tons per day from the south shaft and continues to block out the ore in the development of that vein. While it is generally admitted that the company has enough in the treasury to declare a dividend, it is thought poor policy to make a distribution without shipping enough to create a surplus. Columbus Consolidated shumped off to 24½ with the 10-cent assessment delinquent tomorrow. On the open hoard, 200 Ely Witch was the only unlisted traded in, 200 shares of that stock selling at 11. During the mornin- 22,000 shares changed hands with a value of \$3,739.

CONCENTRATES.

Mr. Fitch of the Chief Consolidated denies that his company is in any way connected with the proposed merger in East Tintic.

Leonard Cahoon is in the city from Eureka, where he is engaged in the construction of the new concentrator for the Chief Consolidated.

General Manager Ernest Lambourne of the Daly Judge has returned from an inspection of the mine. H. J. Fitzgerald of the Lehi-Tintle reports that work has commenced on the new tunnel that will be run to tap that property at depth.

A. J. DAVIDSON FOUND,

Chicago, Nov. 25.-A. J. Davidson, former president of the St. Louis & former president of the St. Louis & San Francisco railroad, who has been missing for several weeks was found yesterday in Michigan avenue by Frank Reptto, house detective of a Michigan avenue hotel.

He refused to answer all questions regarding his disappearance.

The former railroad president spent the night at a downtown hotel.

AMERICAN SMELTERS SECURITIES BONDS

New Method of Financing Which Makes Obligations of Company Convertible.

The plan for the financing of the American Smelters Securities company officially announced last week is decidedly different from what was, previously outlined in the newspapers, upon which we made some comments As now formulated the A. S. S. company is to liquidate its floating indebtedness, amounting to approximately \$11,000,000, complete the purchase of the Baltimore refinery, on which \$1,967,200 s still owed, and acquire some surplus cash for the purposes of its business, by the issue of \$15,000,000 of 15year, 6 per cent, debenture bonds. which are convertible for 71/2 years into the common stock of the American Smelting & Refining company whenever the bonds sell at par or above; and are redeemable at 105 on 90 days' notice at any time after four years. The bonds have been underwritten and are to be offered to the stockholders of the A. S. & R. com-

pany at par. In so far as the A. S. S. company is concerned this plan is of course beyond the criticism of even the captious. This company will simply fund its floating indebtedness and obtain a surplus of about \$2,000,000 (less underwriting comabout \$2,000,000 (less underwriting com-missions) at no great increase in the annual interest charge. Some other features of the plan, however, are pe-culiar, especially the convertibility of these bonds into the stock of the A. S. & R. company, involving naturally an increase in the capital stock of the lat-

ter.

The basis of conversion has not yet been stated, but the bonds are to be issued at par and we dare say they will be convertible into stock at par. The earnings of the A. S. S. company and the volume of its business are such that its debentures will undoubtedly be a safe investment. As a further inducement the subscribers will have what will amount to a call on an equivalent of the comsubscribers will have what will amount to a call on an equivalent of the common stock of the A. S. & R. Co., i.e., if the latter should rise sufficiently above the conversion parity, the bondholder can sell stock, borrowing for delivery, and complete the transaction by converting his bonds, upon which he has received 6 per cent in the meanwhile. Assuming this to be done by everybody the A. S. & R. Co. will become the holder of the present bond issue of the A. S. S. Co., in consideration of an increase in its capital stock, and when rease in its capital stock, and when the bonds have been paid off the A. S. & R. Co. will be in possession of \$15,000.-000 in cash now to be supplied by the

000 in cash now to be supplied by the public, which will be represented by its additional common stock.

If the A. S. S. Co. were not affliated with the A. S. & R. Co. and had to proceed like most companies, probably it would have to Issue bonds and trust to itself; but it would have been difficult, perhaps impossible, to offer subscribers the speculative inducement that is now presented. The present subscribers the speculative inducement that is now presented. The present plan is bound to excite admiration for its ingenuity. The project of making the obligations of one company convertible into the stock of another is certainly remarkable, and so far as we are aware without any precise precedent. However, the important thing in the status of the A. S. & R. Co., is the preservation of its surplus in a conservative form. The common stock of this company, representing chiefly the earning capacity arising from organisubstantially so. Now, the company has never, in our opinion, allowed sufficiently for amortization, which in its case has taken the form of rebuilding its old plants and establishing new the substantial of the company of the compa ones, and we have repeatedly made criticisms on this ground. The mere criticisms on this ground. The mere maintenance of capacity by such a company does not necessarily fulfill the conditions of amortization. Thus we have seen this particular company discard two of its plants in Colorado and we see it at the present day with a smelting capacity of 1,600,000 tons per annum in that state, but with a use for only half of it and grave doubts as to whether the ore supply will increase. It is needful to allow for such alterations in conditions, will increase. It is needful to allow for such alterations in conditions, which may arise from exhaustion of mines, changes in the metallurgical art, adverse tariff legislation, etc. The great cash surplus of the A. S. & R. Co. has been, and is, a reserve that has excused insufficiency of amortization and has given a standing to the preferred stock of the company which would not have been acquired if the surplus had been distributed as dividends upon the common stock. The

TODAY'S MONEY MARKET.

dends upon the common stock. The fact that no such distribution has been made manifests that the management itself has been of this opinion. The present and prospective conditions of

silver-lead and silicious ore mining in Colorado, Utah and Idaho, the chance that a reduction in the tariff on lead may be made in the not very distant

future, the growing competition in some districts and the changing con-ditions in Mexico indicate that a con-

servative policy is now wiser that ever.—Engineering and Mining Jour

WARM DEFENSE OF CHRISTIAN SCIENCE

Phoenix, Ariz., Nov. 25.—A warm defense of Christian Science and the passage of a sweeping child labor, measure along the lines favored by the national child labor committee were features of the morning session of the constitutional convention, today. The constitutional convention today. argument on the methods of healing was occasioned by the introduction of a committee measure prohibiting dis-crimination against "any method of ealing" in the new state. Judge Wells of Yavapai county, a prominent Christian Scientist, made an eloquent defense of the doctrine, while Dr. Tuthill of Greenlee county spoke for the medical profession, After a lengthy debate the measure was indefinitely post-

The child labor measure prohibits the employment of children under 14 years of age during school hours, and orbids those under 16 working at azardous occupations. The measure also prohibits night work and restricts the working day for minors to less than eight hours. Other measures adopted today pro-

other measures adopted today pro-hibit the issuing of blacklists and the intermarriage of races. A measure pro-tosing the creation of the office of sanitary engineer was rejected. The labor commission proposition was still inder discussion when the noon reces: was taken.

COUNTESS TOLSTOLILL.

St. Petersburg, Nov. 25.-A news dispatch from Tula today says Countess Tolstoi is III, having a temperature of

makes his daughter Alexanderia the legatee of his unpublished works.

PERSONALS.

Mark Austin, agricultural superin-endent of the Utah-Idaho Sugar com-any for the Idaho fields, is in the city He states that the sugar fa tory at Sugar City will end its run about Dec. I, and that at Idaho Falls a few days later. The indications for the beet acreage next year are better than for some time past, as the slump in the prices of grains and hay in the lidaho fleld, which have been quite heavy, have turned the attention of the farmers toward beet culture more strongly than for a number of years past.

COURT NOTES.

Action for divorce was begun today Action for divorce was begun today in the district court by Albert Poulsen against Josie Poulsen. They were mar-ried in Sait Lake on Nov. 39, 1998, and on Jau. 19, 1999, according to the com-plaint, Mrs. Poulsen deserted her husband.

Judge C. W. Morse today signed a decree in the case of W. H. Alder and W. M. Gundry, by which their co-part-nership affairs are settled amicably.

In the action brought to foreclose a a mortgage on property in Murray Insti-tuted by John Wood against C. F. Du-rand and Olive Durand, Judge C. W. Morse today signed a decree ordering the property sold at sheriff's sale. The judgment was for \$3,150.

ILLUSTRATED CATALOG OF

PRODUCE.

CHICAGO. CHICAGO.

Chicago, Nov. 25.—Rain in Argentina today benefitted the wheat crop there, repressed owners here and caused a sharp decline in quotations. Slowness in the flour industry at Minneapolis was also a bearst in filmence. Confidence on the part of the bulls suffered further on expert opinions that the winter crop in the southwest is not being retarded seriously to disturb the general optimistic outlook. The opening was \$\frac{1}{2}\$ to 1 lower. May started at \$\frac{1}{2}\$\$ to \$\frac{1}{2}\$\$ to 25. acted to 27. Fine weather weakened corn but commission buying led to a rally. May opened \$42 to 294 lower at 46 to 2 and then rose to 473.

rose to 474.

Oats were easy on scattered selling until firmness of corn induced a steadler tone. May started at \$\frac{1}{2}\text{if}\$ off at \$\text{2}\text{i}\$ but recovered to \$34@\text{i}\$.

Provisions drooped on account of cheaper prices for hogs. First sales were unhanged to 15c, lower with January at 7.00 for pork; 9.721@9.75 for lard, and 9.00

and the close was 2 net lower at 964 for May.

Export sales had a bullish effect. The close was steady with May at 47k, a gain of 1@4.

To Form Basketball League—Representatives of the north division of the state high school basketball league will meet at 3 o'clock Saturday afternoon at the Y. M. C. A. for the purpose of organizing and electing officers, The schedule for the season will also be formulated.

Roller Skating Beglus-The skating season opened. Thanksgiving night at the auditorium in the presence of about 900 lovers of the sport, and the program arranged proved to and the program arranged proved to be a most pleasing one. The building was attractive in the new decorations, the increased lighting facilities, the French plate mirrors along the walls and the upholstered seats. Willie Schatz, Utah's champion speed skater was present and stated he was ready to give any exater in the state a chance to writt the title from him. Manager Omara announced that he would have an opponent for Schatz within the next two weeks.

N. V. Jones Improving-Attorney N N. V. Jones improving—Atterney A. V. Jones, who was taken ill with acute kidney trouble, and removed recently to the Dr. Groves L. D. S. hospital, is improving. He rested well last night and Dr. S. H. Al'en says he will re-

SKY PILOT OF THE LAKES.

A parish 1,800 miles in length and 300 miles in width is in charge of the Rev. W. H. Law, known from Buffalo to Duluth as the sky pilot of the great

The membership of this parish runs into the thousands and the great majority of the parishioners never worship twice in the same locality, for services are held mostly in the moving ships. Some are held in lonely lighthouses far from other human habitation.

No wedding has ever taken place in this parish, no christening of a baby, no services for the burial of the dead. no services for the burial of the dead.

This sky pilot seeks his parishloners in a small gasoline boat 22 feet in length. Besides carrying the message of the gospel to these men, he takes to them books, magazines, papers and news of the outside world. His visits are looked forward to by the lighthouse keepers and the lightship crews, for his territory is so large that he is unable to visit them more than once during the season. He maintains a

his territory is so large that he is unable to visit them more than once during the season. He maintains a small circulating library of not more than 70 books. He also carries with him a phonograph, with records of the most popular hymns.

Some of the lightheuses visited are far from the mainland and the trips to them are hazardous. Standard Rock light, for instance, is nearly 50 miles out from Marquette on Lake Superior. It is creeted on a small, but dangerous, reef, which resembles a whale's back. The light is 105 feet in height and rests on crib work which is encircled by a railway and for weeks at a time the weather is so bad that it is dangerous for the keepers to venture out of doors. Between the light and Keweenaw Point there is a depth of 1,000 feet of water.

On his travels the sky pilot visits 300 lighthouses, 15 lightships and 60 life-saving stations. Mr. Law does not outwardly resemble a minister of the gospel. He is big and healthy and has a relling gait like a sailor, He preaches simply to the sailors, with whom he is

rolling gait like a sailor. He preaches simply to the sailers, with whom he is very popular.—Chicago Inter-Ocean.
